Performance Summary of Electricity Distribution Companies

1	Period of Information Year of (FY) information including Date and Month (Start & End)	1st Jan, 2023 - 31st March, 2023	
2	Technical Details		
(a)	Energy Input Details		
(i)	Input Energy Purchase (From Generation Source)	Million kwh	11276.47
(ii)	Net input energy (at DISCOM Periphery after adjusting the transmission losses and energy traded)	Million kwh	11002.81
(iii)	Total Energy billed (is the Net energy billed, adjusted for energy traded))	Million kwh	9421.50
(b)	Overall Distribution (D) loss Details	Million kwh	1581.32
		%	14.37%
	Collection Efficiency	%	108.46%
(c)	Aggregate Technical & Commercial Loss	%	7.13%

** Note - It shall be mandatory to record the energy supplied separately for each category of consumers which is being provided a separate rate of subsidy in the tariff, by the state government, so that the subsidy due for the electricity distribution company is quarterly calculated by multiplying the energy supplied to each of such category of consumers by the applicable rate of subsidy notified by the state government.

I/We undertake that the information supplied in this Document and Pro-forma is accurate to the best of my knowledge and if any of the information supplied is found to be incorrect and such information result into loss to the Central Government or State Government or any of the authority under them or any other person affected, I/we undertake to indemnify such loss.

Remarks: 1. In AG there are multiple types of subsidy granted like Fuel Charge, Fix Charge, Tariff compensation etc.

2. The same is being claimed as per the actual amount assessed. Only Fuel charge subsidy has unit rate based evaluation.

3. Water works subsidy is granted for entire energy bill, in which there are different per unit rates for each elements. i.e Energy Charge, Fuel Charge etc.

4. Due to above circumstances it is very difficult to derive fixed unit rate based amount. So subsidy amount in column 10, 11 & 12 based on the actual amount claimed and average per unit has been derived by dividing the subsidy amount with the unit.
